

ABDUL HAKEEM M.K

Full Stack Developer (MERN) | React.js | Node.js | Python

Abu Dhabi, UAE | +971 50 831 5426 | hakkimbinqamarjeb@gmail.com

abdulhakeemmk.netlify.app | github.com/hakkimbinqamar123 | linkedin.com/in/abdul-hakeem-m-k

PROFESSIONAL SUMMARY

Full Stack Developer building secure, scalable, and high-performance web applications using React.js, JavaScript, Python, and Node.js. Experienced in designing RESTful APIs and modular service architectures, integrating third-party APIs and automations, and implementing robust authentication (JWT, OAuth) and secure coding practices. Comfortable working across the AI application stack — Python-based backends, structured data pipelines, and tool-calling API integrations. Proven ability to bridge frontend and backend concerns, collaborate cross-functionally, debug complex systems, and ship production-ready, customer-facing applications at scale.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SCSS

Frontend: React.js, Next.js, React Hooks, Redux, Context API, Tailwind CSS, ShadCN UI, Bootstrap, Recharts, Responsive Design, Cross-Browser Compatibility

Backend & APIs: Node.js, Express.js, RESTful API Design, Microservice-Oriented & Modular Service Architecture, Middleware Architecture, Async/Await, Error Handling, Server-Side Rendering

Authentication & Security: JWT Authentication, OAuth, Role-Based Access Control (RBAC), bcrypt, Secure Coding Practices, Input Validation, Third-Party Integrations

Databases: MongoDB, MySQL (Joins, Indexing, Transactions), Database Design & Optimization

PROFESSIONAL EXPERIENCE

Web Developer & IT Support Engineer

Dec 2025 – Present

Virtual Teams Information Technologies, Abu Dhabi, UAE

- Developed and maintained scalable, SEO-friendly, secure web applications using React.js, Next.js, TypeScript, Node.js, and Express.js, ensuring fast page rendering, search engine visibility, and production-grade quality.
- Built and optimized RESTful APIs with MongoDB/MySQL using modular service design, improving system response time by 15–20% through efficient query design and code reuse.
- Leveraged ShadCN UI component library and custom React Hooks (useMemo, useCallback, useEffect) to build reusable, accessible UI components, reducing duplicate code by 25% and accelerating feature delivery.
- Implemented JWT-based authentication, OAuth, protected routes, and role-based access control (RBAC) across full-stack applications serving multiple user roles, following secure coding best practices.
- Act as the first point of contact for IT incidents and service requests, providing L1 technical support.
- Troubleshoot hardware, software, Windows OS, printers, and network connectivity issues.
- Perform user account administration, password resets, access provisioning, and Active Directory management.
- Perform email analysis and troubleshooting using Microsoft Exchange Admin Center, including mailbox management, mail flow analysis, and email delivery issue resolution.

Assistant System Engineer – (Internship)

June 2025 – Oct 2025

Tata Consultancy Services (TCS), Chennai, India

- Completed enterprise-level Initial Learning Program (ILP) covering full-stack development, REST API integration, SDLC, and Agile/Scrum workflows.
- Built a mini full-stack project applying React.js, RESTful APIs, and Scrum practices; contributed to both frontend-backend integration and reusable component/service design.
- Gained hands-on exposure to enterprise application architecture, secure development, and production-environment practices.

Freelance Web Developer

Jan 2022 – Dec 2024

Atlanta Wedding Company, Remote

- Designed, developed, and maintained responsive full-stack websites using HTML5, CSS3, Bootstrap, and JavaScript; ensured cross-browser compatibility across all major browsers.
- Built SEO-optimized pages supporting 500+ concurrent users; reduced page response time by 20% through full-stack performance tuning on both client and server sides.
- Integrated third-party services, managed deployments, and documented application changes for ongoing maintainability.

KEY PROJECTS

Marco Polo – E-Commerce Platform | React.js, Redux, Node.js, Express.js, MongoDB, JWT

- Built a complete full-stack e-commerce solution: Node.js/Express.js REST API backend with MongoDB data models, and a React.js/Redux frontend with reusable UI components.
- Implemented JWT authentication, OAuth, bcrypt password hashing, protected routes, and role-based access for admin and customer users across the full stack.
- Optimized frontend rendering and backend query performance, improving page load speed by 20%; modular architecture reduced duplicate code by 25%.
- Conducted E2E testing and cross-browser debugging to ensure consistent user experience on desktop and mobile devices.

Tasty Track – Food Delivery Web App | React.js, Node.js, Express.js, MongoDB, REST APIs

- Developed end-to-end food delivery application: Express.js/MongoDB backend APIs for real-time order tracking, and a responsive React.js frontend with dynamic content rendering.
- Implemented async/await patterns, robust error handling, and optimized API design — reducing API response handling time by 15% and page load time by 18%.
- Applied reusable component architecture and mobile-first, cross-browser compatible UI design throughout the full-stack application.

EDUCATION

Master of Computer Applications (MCA) — Marian College Kuttikanam, CGPA: 7.9 2022 – 2024

Bachelor of Computer Applications (BCA) — St. George's College, Aruvithura, CGPA: 7.0 2019 – 2022

CERTIFICATIONS

- Full Stack Developer Certification — Dec 2025
- SQL and Relational Databases 101 — Oct 2023
- Red Hat System Administration I (RH124) — Apr 2023
